

peerhatch Maintenance

To obtain maximum service from your peerhatch product please note the following care instructions.

Day To Day Cleaning

Dry erase can easily be wiped from peerhatch walls leaving no residue with a clean microfiber cloth.

Long Term Maintenance

If you do experience any residue from other forms of marker after leaving on wall for months, use a spray bottle with a solution of 70% Isopropyl Alcohol (IPA), and simply spray the surface and wipe with a microfiber cloth.

Other Important Tips

- Use only select dry erase markers – EXPO[®] Low Odor – for writing on peerhatch.
- If non-specified marker is accidentally used, such as a permanent marker or felt pen, clean immediately with a clean microfiber cloth and solution of 70% Isopropyl Alcohol (IPA).
- If you want to clean a large area quickly, we recommend using a Swiffer cleaner to “mop” over as if cleaning a floor. For speedy results, use a wet one and let dry for a short time.
